

smartload

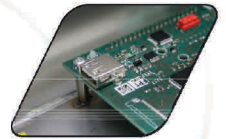

Semi-automatic

Graphitronic / XC+

Savings

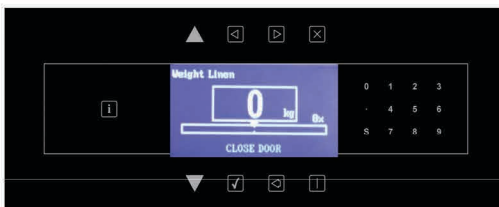

Retrofit kit

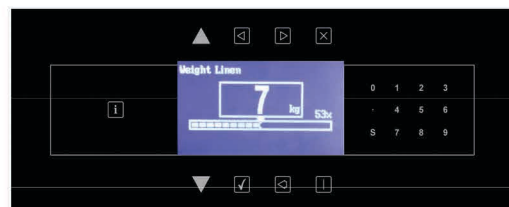

Features:

- **Semi-automated weighing system** - Allows the user to enter the wash load weight manually on keyboard. Program automatically adjusts the water level, heating times and liquid detergent. Display will also show exact filling of machine in percent.
- **Controllers** - Available for both state of the art Graphitronic and XControl+ controllers
- **Savings** - Smartload could save up to 35% (depends on model) on water, energy and detergent costs. It means even better rentability and ecology.
- **Retrofit kit** - Also our existing customers can take advantage of this latest technology and order retrofit kit to use Smartload. Just upload extra software. No other external accessories are needed.
